

This term we will asking the question: What makes me special? We will look at people who are in our family and how we have changed over time. We will focus on how we keep our bodies healthy and which foods help us stay strong.

Understanding the world - Keeping Healthy

We will look at why it is important to grow, and how we have change over time. We will look at how we can keep our teeth and body healthy and why it wouldn't be a good idea to eat sweets everyday! During daily snack time we will try lots of different fruits, to see which ones I like best.

Physical Education

We will take part in daily gross motor activities and a focus PE session every Friday.

**What makes me special?
Do I like to eat healthy snacks?**

English

We will settle in and recap our good listening skills. We will recap known nursery rhymes and use these rhymes to retell new stories and gain confidence performing in front of an audience. We will learn and retell the traditional story 'The little red hen'.

Phase 1 phonics - focuses on developing speaking and listening skills, which are foundational for later reading and writing development. This phase emphasizes activities that help children tune in to sounds, discriminate between them, and begin to manipulate them orally. It's a crucial first step in a child's phonics journey, preparing them for more formal grapheme-phoneme work.

Continuous provision provides children with readily available, carefully chosen resources that encourage independent exploration, learning, and development. It allows children to pursue their interests, revisit familiar activities, and extend their learning without constant adult direction. This fosters independence, creativity, and a deeper understanding of concepts.

Expressive Arts and Designs

We will explore, taste and plan a healthy snack. We will be able to explain why some snacks are more healthy than others.

Maths

More than, fewer than, same

In this block we will explore 'comparision' – we will collect objects so we can see and feel different amounts.

Explore and build with shapes and objects

In this block we will explore simple shapes, space and measure. We will observe how to construct with a range of objects and how to manoeuvre objects into different positions.
