Rationale for the teaching of Computing

Computing equips pupils with skills and understanding that allow them to think logically, creatively and to have courage to explore new technologies and preparing them for the future workplace. Pupils at Newstead Primary School are given opportunities to become computer literate and active citizens in an ever growing digital world by using computing, computer science, information technology and digital literacy.

Aims for the teaching of Computing

Our aims in Computing are that all children can:

- Use a variety of software and apps competently and confidently.
- Tackle any upsetting or inappropriate content they might access online.
- Develop their logical, problem-solving and analytical skills.
- Evaluate and apply information technology to solve problems
- Use information and communication technology responsibly, competently, confidently and creatively.
